

Lancare

Lancare specialised in the provision of both local area and wide area networks throughout the UK. The Company was one of the largest suppliers of Cisco (gold partner), 3Com and AT & T systems in the country.

Lancare built a remote management centre utilising the WideAwake enterprise management platform linked to a variety of major vendor management systems to provide remote management and monitoring services to a number of major corporates that include Barclays Bank, British Airports, Office of Trade Indemnity etc.

The Company was one of the largest suppliers of structured cabling systems in the UK with specialist training and manufacturing facilities in Birmingham and provided the networking for a number of City trading houses and cabled all the prisons in England and Wales.

Major Projects Included:

Barclays Bank - The remote management of the Barclays Bank backbone network from the Bristol Management Centre, the refurbishment and networking of all

Barclays branches in the South West, Wales and the Midlands together with the CAT 5 refurbishment of the Poole trading offices.

British Airports Authority - The management and networking of Gatwick Airport from our airside offices.

JANET - Lancare was jointly awarded 50% of the JANET 2 backbone network linking all universities and colleges of higher education.

Palace of Westminster - The refurbishment and re-networking of the Palace of Westminster.

NALGO - The Company provided all the interoffice networking and infrastructure for NALGO throughout the UK.

Lancare was awarded the networking contracts for a number of NHS Trusts throughout the UK which ranged from the provision of networks to completely managed services that included the provision of Switchboard operators and pay as you go TV and communication services.
