

## **WideAwake**

Wideawake developed highly sophisticated event management and real time correlation solutions. The products were designed to enable network management organisations to utilise best of breed tools as an alternative to traditional framework management offerings. Products won best new European product of the year award and were adopted and are still being used by a number of main stream service suppliers. These included Cable and Wireless, Redstone, Trend, Capita, Synstar, Hewlett Packard and Lancare.

The Knowledge Group Service Management divisions utilised the tools to provide 24/7 management of the Barclays bank backbone network, British airport network and a number of other major corporate environments.

Wideawake was acquired by RMS in .....
